

QA REVIEW REPORT: WEB PLATFORM

AcePharm — Web Platform Revision Service (acepharm.co.uk) | QA Officer: Hafiz Saad | Developer: Numan Latif | Date: 16/09/2026

Review Summary

Overall Result	FAIL — not ready for production sign-off
Review Date	16/09/2026
Project	AcePharm — Web Platform (Source: Developer Brief v2.1 & Website Copy v2.0)
Lead Developer	Numan Latif
QA Reviewer	Hafiz Saad (Senior QA Officer, Takween Digital)

Category / Audit Domain	Audit Status
Public Marketing & Trust Strip	Fail
Account Creation & Consent Compliance	Fail
Core Question Engine (Learn & Timed Modes)	Partial
Question Content Authenticity & Authoring	Fail
Grounded AI Tutor Layer ('Ace')	Fail
Dashboard & Progress Analytics	Partial
Stripe Billing & Subscriptions	Pass

Notes to Developer

This QA audit evaluated the current staging build against the AcePharm Developer Brief v2.1 and Website Copy v2.0. The platform exhibits substantial core engineering progress: the Next.js App Router architecture is responsive, Auth.js session authentication operates reliably, dual-store attempt logging successfully writes separate first-attempt vs. practice records, and Stripe Checkout in test mode processes transactions smoothly.

However, the overall verdict is **FAIL** due to four critical issues with severe regulatory, legal, and operational consequences. Most urgently, **ACE-20** introduces an unapproved 'GPhC Aligned' badge which directly violates non-negotiable Rule #17 ('No implied endorsement by GPhC, NHS, or universities'). Second, **ACE-17** publishes marketing claims of '1,905 authentic revision scenarios' while the live product only contains 135 seed questions (a 14x overstatement). Third, **ACE-18** reveals templated placeholder content reused across unrelated therapeutic topics (Type 2 Diabetes sharing identical options B through E with Pharmacy Law). Finally, **ACE-12** labels the AI tutor as a 'Clinical Pharmacist', violating strict regulatory boundaries prohibiting the personification of AI as a licensed clinician.

Issues to Correct — Critical & Fail

[CRITICAL] ACE-20 — Marketing — GPhC Aligned Trust Badge — Unapproved 'GPhC Aligned' badge violates Non-Negotiable Rule #17

Issue: A prominent 'GPhC Aligned' badge appears in the marketing trust strip and question bank banner. Rule #17 of the Developer Brief explicitly mandates: 'No implied endorsement by the GPhC, NHS, NICE, universities or any other regulatory body'. This presents severe compliance and legal exposure for Takween Centre UK Ltd.

Fix Required: Remove the badge immediately. Replace with approved copy deck wording: 'Mapped to GPhC Registration Assessment Framework' or 'Built around the GPhC indicative syllabus'.

QA Note: Immediate compliance blocker. Cannot be promoted to production under any circumstances with this badge.

[CRITICAL] ACE-12 — Pricing & Feature Matrix — Ace AI Tutor Wording — Ace AI Tutor labelled as 'Clinical Pharmacist', implying medical authority

Issue: The comparison matrix rows describe Ace as 'Ace AI 24/7 Clinical Pharmacist Tutor'. This violates the brief's non-negotiable rule prohibiting terminology that personifies Ace as a clinician or licensed medical authority.

Fix Required: Reword to approved copy deck phrasing: 'Ace AI Study Companion (24/7)' or 'Ace AI Tutor — Grounded Clinical Revision Assistant'. Emphasize study tool functionality.

QA Note: Regulatory risk: UK pharmacy education standards prohibit unlicensed entities/AI models from claiming the title 'Clinical Pharmacist'.

[CRITICAL] ACE-17 — Cross-Page — Question Bank Inventory Counts — *Severe mismatch in advertised vs. real question counts (1,905 vs. 135)*

Issue: Marketing pages claim '1,905 authentic revision scenarios available' (e.g. Cardiovascular System: 160 Questions). However, logged-in learner dashboards show 0/28 attempted, the Session Builder lists Cardiovascular as 20 Qs, and the admin system banner displays '135 Seed Questions Live'. Advertising 1,905 questions when only 135 exist is a 14x overstatement.

Fix Required: Reconcile all marketing and application counters to reflect the authentic published question inventory. Never publish exaggerated counts that misrepresent product contents.

QA Note: Directly breaches Non-Negotiable Rule #15 ('No fabricated statistics, counts, or endorsements').

[CRITICAL] ACE-18 — Question Engine — Content Authenticity — *Templated placeholder options reused verbatim across unrelated topics*

Issue: Audit of question records revealed that ACP-SEED-0007 (Cardiovascular/Type 2 Diabetes) and ACP-SEED-0039 (Pharmacy Law & Ethics) contain identical answer options B through E word-for-word, merely swapping question stems. This placeholder text compromises clinical validity.

Fix Required: Purge all templated question mocks. Ensure all 135 seed questions are individually authored, fully validated with distinct 5-option rationales, and reviewed by clinical editorial staff.

QA Note: A clinical platform cannot launch with templated mock rationales; clinical trust is the core value proposition.

[FAIL] ACE-11 — Ace AI Page — Core Governance Disclosures — *Two of six core AI safety principles replaced with generic marketing text*

Issue: The Ace landing page drops 'Feeds the Editorial Queue' (flagged responses route to human review) and 'Never Marks Its Own Homework' (AI-drafted questions require pharmacist review), replacing them with generic marketing bullets.

Fix Required: Restore the two missing governance disclosures from the copy deck. These disclosures establish trust with university partners and students.

QA Note: Essential governance requirement defining human-in-the-loop oversight.

[FAIL] ACE-19 — Learner Dashboard — Empty State Logic — *Zero-attempt learner accounts display stale mock data instead of empty state*

Issue: New learner accounts with 0 attempts show an active 'Weak Area Focus Drill' recommendation citing 'recent practice', and an activity graph showing 25 questions answered in August. The spec'd 'Let's build your starting point' empty state does not trigger.

Fix Required: Conditionally render the onboarding empty state whenever total question attempts equal 0; suppress dummy activity chart data for unpracticed accounts.

QA Note: Confuses new learners and damages trust in the recommendation engine.

[FAIL] ACE-22 — Authentication — Sign-Up Consent Checkboxes — *Mandatory Terms of Service and Privacy Policy consent checkboxes missing*

Issue: The live registration modal omits the mandatory checkboxes for Terms of Service / Privacy Policy consent and optional email marketing opt-in, while prematurely pulling Onboarding Step 1 (MPharm stage) into the registration form.

Fix Required: Restore mandatory Terms/Privacy consent validation on form submission per GDPR requirements. Revert stage selection to the onboarding wizard.

QA Note: Legal/GDPR compliance requirement for processing learner data.

Issues to Correct — Partial & Minor

ID	Section	Issue	Required Correction
ACE-01	Global Nav	Nav links deviate from copy deck ('About' missing; 'Product' renamed).	Restore 'About' and align navigation labels verbatim with copy deck.
ACE-09	Question Bank	Category tag pills truncate long text with ellipses (e.g. 'Medicines Ethics & Practic...').	Adjust CSS pill wrapping and flex-shrink to display full category titles.
ACE-10	Practice Modes	'Choose your mode' surfaces only 3 modes vs. spec'd 8 study modes.	Implement remaining 5 study modes (Weak Areas, Unseen, etc.) or document scope deferral.
ACE-14	Blog & Editorial	Blog post directly names competitors and asserts unverified 'Best Platform' claims.	Obtain formal legal sign-off or revise comparative marketing claims to adhere to brief rules.
ACE-15	Blog Engine	Scheduled blog post with future publish date (18/09/2026) is already visible live.	Enforce strict publish-date gating in blog CMS query filter (where publish_date <= now()).
ACE-24	Contact Page	Eyebrow header uses American spelling 'INQUIRIES' instead of British English.	Update header copy to British convention: 'SUPPORT & ENQUIRIES'.

Overall Impression & Strategic Assessment

Strongest Area	Responsive Next.js UI performance, Auth.js session stability, robust dual-store attempt logging architecture, and reliable Stripe Checkout payment processing.
Weakest Area	Content authenticity and regulatory adherence — specifically fabricated question inventory counters, placeholder question options, and improper GPhC endorsement claims.
Red Flags	ACE-20 ('GPhC Aligned' badge); ACE-12 ('Clinical Pharmacist' AI tutor label); ACE-17 (14x question count overstatement); ACE-18 (templated placeholder clinical questions).
Recommendation	Reject production promotion. Prioritize fixes: (1) Remove unapproved GPhC badges and reword AI tutor labels; (2) Reconcile question bank metrics across marketing and dashboard; (3) Ingest authentic, reviewed Seed Bank v0.1 questions; (4) Restore GDPR signup consent checkboxes and new-learner empty states.

Sign-Off Status

QA Officer	Hafiz Saad (Senior QA Officer)
Developer	Numan Latif (Full-Stack Engineer)
Date Resolved	Pending Re-audit
Formal Verdict	REJECTED (FAIL) — Fix Critical & Fail blockers prior to re-submission

A follow-up verification audit will be scheduled once tickets ACE-12, ACE-17, ACE-18, ACE-20, and ACE-22 are demonstrably resolved on staging.
