Review Summary

Area	Verdict
Overall Result	Fail
Homepage	Partial
Features Page	Partial
Question Bank Page	Partial
Ace Page	Fail
Pricing Page	Fail
Blog / Resources	Partial
About Page	Pass
Editorial Standards Page	Partial
FAQ Page	Partial
Contact Page	Pass
App — Sign- Up & Login	Fail
App — Dashboard & Practice Session	Fail
Mobile Responsiveness	Not tested this round

Notes to Developer

There's real strength to build on here. Hero-level copy — headings, opening paragraphs, standalone CTAs, and FAQ answers — matches the copy deck verbatim on the large majority of pages checked, including some genuinely careful touches: correct "practise" (verb) vs. "practice" (noun) usage on the Ethics page, a session builder that honestly caps the question count when a requested pool exceeds what's available rather than overpromising, and an information architecture that follows the brief's page structure closely.

The result lands at Fail because several issues sit squarely in the areas the brief treats as non-negotiable rather than stylistic. Two items read as claims the brief explicitly prohibits: a "GPhC Aligned" badge on the login page (which contradicts the site's own independence disclaimer) and an "Ace AI 24/7 Clinical Pharmacist Tutor" label on the pricing page (which risks implying Ace has clinical authority it doesn't have). Separately, the product's own screens contradict each other and the marketing site on how many questions actually exist — 1905 claimed, 135 confirmed live — and the practice questions a real user would answer are templated placeholder text reused verbatim across unrelated topics, which undercuts the copy's repeated claims about clinical and editorial review.

Beyond these, there's a consistent secondary pattern worth addressing as a batch rather than issue-by-issue: on page after page, the top-level heading and intro paragraph match the copy deck exactly, but the supporting card-level content underneath (trust-strip items, problem-section cards, learning-loop stages, Ace's six principles, pricing bullet lists) has been substantially rewritten. None of these individually are severe, but the pattern is broad enough that a single re-copy pass against the deck would likely resolve most of the Partial/Minor list in one go.

Issues to Correct — Critical & Fail

ACE-20 CRITICAL	
Section	App — Login Page
Title	"GPhC Aligned" trust badge risks reading as a regulator endorsement claim
Issue	The login page displays a "GPhC Aligned" badge alongside "Independent UK Revision" and "GDPR Compliant". This reads as

	a claim of GPhC endorsement or affiliation — matching the brief's banned-phrase category prohibiting any claim of GPhC endorsement — and directly contradicts the site's own footer independence disclaimer, which states AcePharm is not affiliated with or endorsed by the GPhC. Remove or reword this badge before launch. Treat with the same priority as a banned-phrase hit.
Fix Required	
QA Note	<i>Highest priority item in this round alongside ACE-12 and ACE-17.</i>

ACE-12 CRITICAL	
Section	Pricing Page — Feature Comparison Matrix
Title	Ace labelled in a way that implies

	clinical authority The matrix row "Ace AI 24/7 Clinical Pharmacist Tutor" risks implying Ace is a clinical pharmacist or has clinical authority — squarely in the territory the brief's banned-phrases list prohibits (wording implying Ace is a clinician or has clinical authority). Reword to remove "Clinical Pharmacist" framing (e.g. "Ace AI Tutor, available 24/7"), consistent with how Ace is described elsewhere as a study tool grounded in reviewed content.
Issue	
Fix Required	

ACE-17 CRITICAL	
Section	Cross-Page — Question Bank Size
Title	Question-bank size

**figures are
inconsistent,
and the
headline
marketing
figure is
confirmed
inaccurate**

Issue

Marketing
Question Bank
page claims
"1905
authentic
revision
scenarios
available" (e.g.
Cardiovascular
System: 160
Questions).
The logged-in
Dashboard
shows
Cardiovascular
System at 0/28
questions
attempted (28
total). The
Custom
Practice
Session
Builder shows
Cardiovascular
System as 20
Qs, and its
own page
banner states
"135 Seed
Questions
Live" for the
entire product.
135 real
questions
against a
marketing
claim of 1905
is a 14x
overstatement,
and the two in-
product
screens do not
even agree
with each
other (28 vs.
20 for the

	same category). This also affects the "Unlimited (1,500+ items)" claim in the Pricing page's Feature Comparison Matrix. Reconcile all question-count figures against one real source of truth before launch. Do not publish the "1905" figure, or any per-category counts, on the marketing site until they match what the product actually contains. <i>A concrete, provable factual claim, not a style judgement.</i>
Fix Required	
QA Note	

ACE-18 CRITICAL	
Section	App — Live Practice Question Content Practice questions are generic templated placeholder content, confirmed reused across unrelated topics
Title	
Issue	Question ACP-

SEED-0007
(Type 2
Diabetes)

placeholder
content with
genuine,
individually
authored
and
reviewed
questions
before this
is shown to
real users.

QA Note	<i>Confirmed across two separate categories in two separate screenshot batches — a systemic content gap, not an isolated placeholder.</i>
----------------	---

ACE-11 FAIL	
Section	Ace Page — Six Core Principles
Title	Two of six principles replaced with unrelated content, dropping key oversight disclosures
Issue	Principles 1–3 are reworded versions of spec items. Principles 5 and 6 are not reworded — they cover different topics entirely. The spec's "Feeds the editorial queue" (reporting an Ace response routes to the same review process as a question report) and "Never marks its own homework" (AI-drafted questions are labelled and pharmacist- reviewed

	before publication) are both missing, replaced by "Highlight-to-Ask capability" and "Refuses when information is missing". Restore the two missing principles. These are the disclosures the brief treats as central to Ace's trustworthiness, not optional detail.
Fix Required	
ACE-19 FAIL	
Section	App — Dashboard (New Learner State)
Title	New-learner empty state not showing; stale/demo data displayed instead
Issue	The test account has 0 questions attempted in every category (all "Not started", 0% accuracy, 0% coverage). Spec defines a dedicated empty state ("Let's build your starting point") for exactly this case. Instead the dashboard shows a populated "Recommended

	Focus Drill" reasoned on "your recent practice" — illogical for a zero-history account — and a "Last 14 Days Activity" widget showing activity up to 25 questions on a single day, with dates in mid-to-late August, despite today being 15 September and the account never having answered a question. Trigger the spec'd new-learner empty state when attempt history is zero across all categories; remove stale/demo data from the activity widget for new accounts.
Fix Required	

ACE-22 | FAIL

Section	App — Sign-Up Form
Title	Form fields and required consent elements do not match spec
Issue	The live form asks for "Full Name" (not spec's "First name") and adds a

QA Note *The missing consent checkbox is the one item in this round with potential legal/compliance implications.*

Issues to Correct — Partial & Minor

ID	Section	Issue	Required Correction
ACE-01	Site-wide — Nav	Nav links do not match copy deck ("About" missing; "Product"→"Features"; "Ace"→"Ace AI Tutor").	Update nav to match spec exactly, including restoring "About".
ACE-02	Homepage — Trust Strip	Four trust-strip statements rewritten, not verbatim.	Replace with verbatim spec copy.
ACE-03	Homepage — Problem Cards	Three problem cards rewritten, not verbatim.	Replace with verbatim spec copy.
ACE-04	Homepage — Learning Loop	Four learning-loop stages rewritten, not verbatim.	Replace with verbatim spec copy.
ACE-05	Pricing Page — Cards	Pricing card badges/bullets altered; duplicate "Most Popular" + "Best Value" badges on one card.	Align with spec; remove redundant badge.
ACE-06	Site-wide — Footer	Footer link sets (Product/Resources/Company/Legal) don't match spec; several links missing or mislabelled.	Rebuild footer columns to match spec exactly.
ACE-07	Features Page	Section copy rewritten; Analytics section (spec'd for homepage) appears here instead.	Restore spec'd copy; confirm intended page for Analytics section.
ACE-08	Question Bank —	"Explore GPhC Categories" browser	Confirm against

	GPhC Categories	section not in copy deck.	Developer Brief; write approved copy if in scope.
ACE-09	Question Bank — Category Tags	Long tag labels truncate with an ellipsis (3 confirmed instances).	Fix CSS overflow handling on the tag component.
ACE-10	Question Bank — Study Modes	"Choose your mode" shows 3 modes vs. spec's 8; CTA also differs.	Implement remaining modes or confirm reduced scope; align CTA.
ACE-13	Pricing Page — Extra Sections	"Student & Trainee Discount" and "University & Cohort Access" not in copy deck; the latter is ahead of the roadmap's "Exploring" status.	Confirm against Developer Brief/roadmap; write approved copy or remove.
ACE-14	Blog	Post names competitors directly and makes a "best platform" comparative claim.	Confirm legal/editorial sign-off before this stays live under its current title.
ACE-15	Blog	Post dated 18 September 2026 shown live while system date reads 15/09/2026.	Check date-handling logic for scheduled/future posts.
ACE-16	Site-wide — Nav vs Footer	Same destinations labelled differently ("About AcePharm"/"About Us"; "Contact Team"/"Contact").	Standardise labels across nav dropdown and footer.
ACE-21	Editorial Standards Page	Condensed from spec's 7 sections to 3; standalone Independence statement missing from this page.	Restore missing sections or confirm coverage elsewhere on the page.
ACE-23	App — Register/Login	Headings don't match spec ("Create your free account" vs. "Start revising with clarity"; "Log in to your	Update headings and supporting copy to

		account" vs. "Welcome back").	verbatim spec text.
ACE-24	Contact Page	"SUPPORT & INQUIRIES" uses American spelling.	Change to "SUPPORT & ENQUIRIES".
ACE-25	About Page	CTA reads "Start revising free" vs. spec's "Explore AcePharm."	Update button label or confirm approved deviation.

Suggestions for Developer Consideration — Optional

A genuine architecture-level pattern emerged across this round, worth addressing structurally rather than page-by-page:

- Re-sync all card-level content (trust strip, problem-section cards, learning-loop stages, Ace's six principles, pricing bullet lists, feature comparison matrix) directly against the copy deck in a single pass, rather than fixing each instance individually — the same pattern (top-level headings verbatim, supporting card content substantially rewritten) recurs across nearly every page checked in this round.
- Drive question-bank counts from one shared source of truth used by the marketing site, dashboard, and session builder alike, so the kind of drift found in ACE-17 (160 vs. 28 vs. 20 vs. 135 for the same content) cannot recur.
- Standardise page-destination labels in one place (e.g. a shared nav/footer config) so the nav dropdown and footer can't drift apart, as seen in ACE-16.

Overall Impression

Strongest Area	Hero-level copy fidelity — headings, CTAs and standalone paragraphs match the copy deck verbatim across the homepage, Features, Pricing, Ace, About and Contact pages.
Weakest Area	The logged-in application experience — question-bank size claims don't

	match the real product, and live practice content is unfinished template placeholder text. "GPhC Aligned" badge (ACE-20); "Clinical Pharmacist Tutor" label (ACE-12); confirmed 135-vs-1905 question count overstatement (ACE-17); templated question content reused verbatim across unrelated topics (ACE-18). Do not launch until the four Critical items are resolved. Suggested fix order: (1) Remove/ reword the GPhC Aligned badge and Clinical Pharmacist Tutor label — compliance risk; (2) Reconcile question- bank numbers site-
